I love Zoe, but Leonard is so upsetting to deal with that he ruins the enjoyment of many of her scenes. I wish there was a way to opt out of dealing with Leonard. I deal with enough of that toxicity in real life and do not want it in my fantasy game. Otherwise I've enjoyed everything else about Second Term DLC so far.. Remember fish wife from the base game? Well now she's overshadowed by Eldritch abomination wife. So I guess now it's rated 20/10.. This is a wonderful game and I love playing it with my friends online. :) I hope I'm able to donate to get some of the nice things offered but if not I'll try to save to hopefully get something later if that's possible!. Dear Devs.

I actual love you guys right now. not only did we get more monster prom BUT WE GOT ZOE!! YAAASSS!!!! I am trying my best to contain my excitement and happiness and I literally just started the game, only five minutes in and she is now literally my soul animal. not only is she fujoshi BUT SHE ALSO LIKE JIMIN!!!! like I am actual fanboying right now, I was screaming when I saw the Jimin part and when I saw somewhere about the other thing (which I won't spoil). The story and extra content added to the game is also phenomenal. from the atmosphere to the emotional connection and even character development. This is and forever will be an extraordinary and out of this world experience, the replayability that is given to us is also incredible. this is definitely without a doubt a 9.5/10. I would've given it a 10/10 if it wasn't for the fact that there's no option for me to transport myself into the Monster Prom universe Thank you so much, you are my new gods.

Your forever loyal fanboy disciple, Jett.

P.S. Still waiting on that Monster Prom show (;
